

This Management's Discussion and Analysis ("MD&A") of financial position and results of operations, as provided by the management of Forest Gate Energy Inc. ("Forest Gate" or the "Company"), should be read in conjunction with the financial statements and related notes thereto for the period ended December 31, 2011. Forest Gate's accounting policies are in accordance with International Financial Reporting Standards ("IFRS"). All dollar amounts are in Canadian dollars unless otherwise indicated.

This MD&A is dated June 25, 2012. The Company's shares trade under the symbol FGE on the TSX Venture Exchange. These documents and additional information about Forest Gate are available on SEDAR at www.sedar.com.

Forward-Looking Statements

Certain information in this MD&A of the Company's financial position and results of operations constitutes forward-looking information. These statements and this information represent Forest Gate's intentions, plans, expectations and beliefs, and are subject to risks, uncertainties and other factors, of which many are beyond the control of the Company. All information other than statements of historical fact may be forward-looking information. In consequence, actual results in the future may differ materially from any conclusion, forecast or projection in such forward-looking information.

Examples of statements that constitute forward-looking information may be identified by words such as "may", "could", "should", "believe", "expect", "plan", "target" and other similar words and expressions. These statements reflect current expectations of management regarding future events and operating performance, and speak only as of the date of this report.

This forward-looking information includes, amongst others, information with respect to our objectives and strategies to achieve those objectives. Readers are cautioned not to place undue reliance on these forward-looking statements or information. You will find more information about the risks that could cause our actual results to significantly differ from our current expectations in the "Risks and Uncertainties" section. We disclaim any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Corporate Overview

Forest Gate is incorporated under the Canada Business Corporations Act and is a publicly listed oil and gas exploration and production, and non-energy resource company trading on the TSX Venture Exchange under the symbol FGE. The Company is seeking to increase shareholder value through participation and development of energy and other resources in Canada and internationally.

In 2007, the Company entered into its first oil and gas project with a joint venture agreement with Emerald Bay Energy Inc. ("Emerald Bay") in a coal bed methane (CBM) project in the Nevis area of Central Alberta. Later in 2007, Forest Gate successfully drilled an oil well at Ferrybank, also located in Central Alberta. This represented the second joint venture signed in 2007 with Emerald Bay. In March 2008, Forest Gate entered into a third joint venture agreement with Emerald Bay to acquire a 38% working interest in the Kelsey exploration well in Alberta. In August, drilling was successful at Kelsey and this gas well was tied-in in the first quarter of 2009.

At a special meeting held on June 23, 2009, shareholders approved Management's proposal to consolidate the Company's common shares at a rate of one (1) new common share for each tranche of ten (10) outstanding common shares and to change the company's name to Forest Gate Energy Inc. The common shares of Forest Gate started trading on June 30, 2009 under the new symbol "FGE".

Late in June 2009, the Company terminated discussions related to the previously announced agreement to acquire 90% of all of the issued and outstanding shares of Atlantis Deepwater Production, Inc. and of Impact Exploration & Production, LLC, of Houston, Texas.

Forest Gate Energy Inc.

Management's Discussion and Analysis

For the period ended December 31, 2011

In October 2009, Forest Gate acquired a 70% equity interest in all Arizona oil and gas licenses belonging to Vanterra Energy Inc. ("Vanterra"). In consideration for the 70% equity interest in the licenses, the Company issued to Vanterra 2,690,000 Forest Gate common shares, 5,250,000 subscription receipts convertible into Forest Gate common shares without any additional consideration and 7,300,000 warrants at an exercise price of \$0.25 per share, which will expire on the second anniversary of their issuance. No such subscription receipt or warrant may be converted or exercised by Vanterra if, as a result of that conversion or exercise, Vanterra would hold more than 15% of Forest Gate's outstanding common shares. Forest Gate undertook to pay 100% of the cost to drill, case, and complete the initial exploratory well on the lands covered by the licenses.

Forest Gate and Vanterra were targeting oil in the Sacramento Valley Neogene Sub-Basin of Arizona which lies within what is known as the Basin and Range Geologic Province, which loosely runs north to south from northern Nevada to southern Arizona and east to west from Utah to California.

In January 2010, the Company began acquiring a number of additional licenses in Utah. Drilling at the Crescent Junction property in Grand County, Utah well began in January 2010. In March 2010, Forest Gate abandoned this first well following production testing that recovered oil but at non-commercial rates.

In May 2010, Forest Gate received a cash call for its portion of its Rush Lake oil prospect in Cedar Valley, Iron County, Utah. The Rush Lake prospect is a shallow-drilling target. The initial 5,000-foot well will test the Dakota Formation and a deeper Navajo target at a cost of \$800,000 or \$1.2 million if completed. Permit applications for drilling at the Rush Lake prospect have been filed.

In July 2010, Forest Gate reported that it has reached an agreement with Vanterra whereby Vanterra would return to Forest Gate 3,596,053 Forest Gate common shares, 4,343,947 Forest Gate's subscription receipts and 7,550,000 Forest Gate common share purchase warrants in exchange for Forest Gate's 70% interest in certain oil and gas licenses vended-in to the company in late 2009 and in January of this year. Vanterra is a private company owned by Donald Vandergrift. Mr. Vandergrift is a former President of Forest Gate Energy.

In October 2010, Forest Gate entered into a Purchase Agreement to acquire the Pershing gold property located near Val D'Or, Quebec from two private gold exploration companies called Montigua Resources Inc. ("Montigua") and Bermont Resources Inc. ("Bermont"). Pershing is a gold exploration property consisting of 252 contiguous, unpatented mining claims. In consideration for the acquisition of a 100% interest in the claims comprising the Pershing gold property, Forest Gate issued 3,000,000 Forest Gate common shares to Montigua and Bermont. In addition, Montigua and Bermont will hold a 2% net smelter return royalty on the Pershing gold property. One percent (1%) of the royalty can be purchased by Forest Gate at any time following the completion of a pre-feasibility study on the property. Forest Gate also holds a right of first refusal on the sale or reassignment of the remaining 1% royalty. Forest Gate also issued 150,000 common shares as a finder's fee to a consultant upon closing of the transaction.

Following the receipt of the conditional acceptance of the TSX Venture Exchange, on November 26, 2010, Forest Gate completed the transfer to Vanterra of the Arizona and Utah oil and gas licenses that were originally vended-in to the Company, and proceeded to cancel the 3,596,053 common shares, 4,343,947 subscription receipts and 7,300,000 warrants that were previously-issued to Vanterra.

On December 23, Forest Gate entered into an agreement to purchase 20% oil and gas assets from a privately-held Calgary company. The total consideration for the acquisition is \$1.5 million. The transaction closed on February 24, 2011.

Forest Gate amended its participation in the oil and gas licences located in areas known as Rangeview, Divide and Katherine in the south western region of the Province of Saskatchewan in July, 2011 and reduced its interest in these properties to 10% from 20%.

Forest Gate Energy Inc.

Management's Discussion and Analysis

For the period ended December 31, 2011

Forest Gate's mineral group completed its acquisition of the Cuff Lake iron property located in the Abitibi region of Quebec, approximately 160 kilometres southeast of Val d'Or and 145 kilometres south of Forest Gate's Pershing iron property for cash consideration of \$100,000.

Pricing

Crude oil prices improved 19% during the year 2011 as compared to 2010 as West Texas Intermediate ("WTI") benchmark price averaged US\$94.87 per Bbl in 2011, as compared to US\$79.40 per Bbl in 2010. The price of crude oil continued to be volatile, a result of uncertainty around future worldwide economic conditions.

Natural gas prices averaged \$3.91 per Mcf for AECO in 2011 as compared to \$4.16 per Mcf (6% decrease) in 2010. Fluctuating North American supply/demand forecasts along with volatile international natural gas prices, which affect the global flow of liquefied natural gas, continue to cause significant price volatility in North American natural gas prices. Continued uncertainty around North American industrial demand has resulted in a continued high volatile price trends for North American natural gas.

Results of Operations

For the twelve months ended December 31, 2011, Forest Gate incurred a net loss from continuing operations of \$3,151,980 (\$0.06 per share) compared to \$3,484,997 (\$0.12 per share) for the same period in 2010. The net profit from discontinued operations was \$45,789 (\$0.00 per share) compared to a net loss of \$19,276 (\$0.00 per share) in the same period of 2010. The total net loss, after discontinued operations in the twelve months of 2011 was \$3,106,191 (\$0.06 per share) and for the same period of 2010 was \$3,504,273 (\$0.12 per share).

The net loss from continued operations of \$3,151,980 in 2011 includes the loss on the sale of 50% participation of Rangeview properties and the devaluation of properties. Forest Gate has reduced its non-operated ownership from a 20 percent undivided working interest to a 10 percent undivided working interest in the licenses, which encompass the original acreage, as well as seven additional sections recently acquired in south western Saskatchewan. The remaining 90 percent interest is owned and operated by Trafina Energy. The loss on the sale was \$542,739, the flow-through obligations expense was \$170,000 and the write-down of assets were \$655,186.

Revenues

For the years ended December 31,	Twelve months	
	2011	2010
	\$	\$
Revenues petroleum and natural gas revenue	632,122	332,603
Royalties	(93,964)	(68,988)
Operating expenses	627,067	93,034

For the twelve months ended December 31, 2011, Forest Gate reported oil and gas revenue of \$632,122 less royalties of \$93,964 and direct operating expenses of \$627,067, compared to revenue of \$332,603 less royalties of \$68,988 and direct operating expenses of \$93,034 for the twelve months ended December 31, 2010. The substantial revenue increase of the year is primarily related to the acquisition in Q1 2011 of a 20% interest in the Rangeview / Divide properties.

Higher oil prices added to higher production volumes for the year 2011, which accounted for higher natural gas production and direct operating expenses in 2011.

Expenses

Expenses consist primarily of petroleum extraction costs, depletion, salaries, professional and consulting fees, general and administration fees and expenses relating to the business development of the Company. Forest

Forest Gate Energy Inc.

Management's Discussion and Analysis

For the period ended December 31, 2011

Gate incurred total expenses from continuing operations of \$2,485,471 in 2011 compared to \$2,404,908 in 2010:

For the years ended December 31,	2011 \$	2010 \$
Revenues		
Petroleum and natural gas revenue	632,122	332,603
Royalties	(93,964)	(68,988)
Interest and other income	163,258	750
	701,416	264,365
Expenses		
Operating expenses	627,067	93,034
Salaries and levies	299,265	588,754
Value of stock option granted	111,647	236,831
Professional and consulting fees	628,949	568,645
Corporate marketing and business development	219,626	199,446
Financial charges	108,553	88,338
Amortization of discount on convertible note	-	103,750
Depletion	320,605	132,855
Depreciation of property and equipment	6,035	10,789
General and administration expenses	163,724	382,466
	2,485,471	2,404,908
Loss before write-downs and discontinued operations	1,784,055	2,140,543
Loss on sale interests in producing oil and gas properties	542,739	-
Flow-through obligations expense	170,000	-
Write-down of exploration and evaluation assets	200,000	-
Write-down of producing oil and gas assets	455,186	1,344,454
Net loss from continued operations	3,151,980	3,484,997

The increase in total expenses relates mainly to the operating expenses of \$627,067 (2010 - \$93,034), offset by lower general and administration expenses of \$163,724 (2010 - \$382,466). The substantial increase in operating expenses during the year is almost entirely due to new investment required at the Rangeview / Divide properties acquired in Q1 2011. Expenses for "salaries and levies" and "general and administrative expenses" declined during the year as a result of management's decision to reduce costs in these two areas via reduced spending on staff, travel, rent, etc. to reflect the challenging environment.

Forest Gate Energy Inc.
Management's Discussion and Analysis

For the period ended December 31, 2011

Selected Quarterly Information

		Net loss (unaudited) \$	Loss per weighted average number of shares outstanding \$

	First quarter	271,963	0.0191

Exploration and Evaluation

As of December 31, 2011, total Exploration and evaluation assets, net of depletion and write-offs, were \$804,622 compared to \$789,256 as at December 31, 2010. The increase is the result of Joint Venture Agreements with Emerald Bay Energy Inc. to acquire working interests in Alberta properties.

	December 31, 2011 Net \$	December 31, 2010 Net \$
Canada	804,622	789,256

On October 8, 2010 the Company entered into a Purchase Agreement and acquired a 100% interest in the Pershing Gold property located near Val D'Or, Quebec, from two private gold exploration companies. Pershing is a gold exploration property consisting of 252 contiguous, unpatented mining claims.

In consideration for the 100% interest in the claims, Forest Gate issued 3,000,000 Forest Gate common shares. In addition, the seller will hold a 2% net smelter return royalty on the Pershing gold property. One percent (1%) of the royalty can be purchased by Forest Gate at any time following the completion of a pre-feasibility study on the property. Forest Gate also holds a right of first refusal on the sale or reassignment of the remaining 1% royalty. A finder's fee of \$150,000 Forest Gate common shares was paid to a consultant.

During the year ended December 31, 2011, Forest Gate capitalized \$415,366 of costs related to the Pershing gold property.

On September 28, 2010, the Company entered into a purchase agreement and acquired a 100% interest in the Cuff Lake iron property located in the Abitibi region of Quebec. Cuff Lake is an iron ore exploration property consisting of approximately 150 contiguous, unpatented mining claims.

In consideration for the 100% interest in the claims, the Company issued cash payments of \$100,000. In addition, the seller will hold a 2% net smelter return royalty on the Cuff Lake property. Fifty percent (50%) of the royalty can be purchased by Forest Gate at any time with written notice together with a payment of \$3,000,000.

Forest Gate Energy Inc.

Management's Discussion and Analysis

For the period ended December 31, 2011

The Company also holds a right of first refusal on the sale or reassignment of the remaining vendor royalty.

United States

Forest Gate has entered into an agreement with Vanterra Energy Inc., whereby Forest Gate acquired a 70% equity interest in all Arizona oil and gas licenses belonging to Vanterra. In consideration, Forest Gate issued to Vanterra 2,690,000 Forest Gate common shares, 5,250,000 subscription receipts convertible into Forest Gate common shares, without any additional consideration, and 7,300,000 warrants at an exercise price of \$0.25 per share. The warrants will expire on the second anniversary of their issuance.

On November 29, 2010 the Company reports that it has completed an unwinding transaction with Vanterra Energy Inc. by transferring its 70% interest in certain Arizona and Utah oil and gas licenses vended-in to Forest Gate in exchange for the surrender for cancellation by Vanterra of 3,596,053 common shares of Forest Gate, 4,343,947 subscription receipts convertible into common shares of Forest Gate, and 7,300,000 common share purchase warrants. Effective November 26, 2010, Forest Gate cancelled all of the foregoing subscription receipts and common share purchase warrants, and remitted the 3,596,053 common shares to its transfer agent and registrar so that the shares could be returned to treasury and cancelled.

Producing oil and gas assets and mining properties

Pursuant to its agreement with Emerald Bay Energy, the Company and its joint venture partners committed to drill two offset wells at the Ferrybank property in Alberta. Forest Gate later opted not to fund its participations. Accordingly, under the penalty clause in the agreement, the joint venture partners will be reimbursed 300% of these costs. As a result, Emerald Bay will withhold from Forest Gate future revenues if the well goes into production. The Company is in good standing with Emerald Bay and they have resumed paying the net revenue from the other pre-existing producing wells.

On February 18, 2011 Forest Gate entered into an agreement to purchase oil and gas assets from a privately-held, Calgary company. Forest Gate owns a non-operated 20 percent interest in oil and gas licenses encompassing 19,848 acres in south western Saskatchewan (Rangeview, Divide and Katherine). The remaining 80 percent interest is owned and operated by Trafina Energy Ltd., a publicly-traded oil and gas company based in Calgary. The total consideration for the acquisition is \$1,579,800. Forest Gate has issued to the vendor 7.98 million shares at \$0.11 per share, assume its bank line of credit in the amount of \$350,000 and assume various liabilities of the vendor with its joint venture partner in the amount of \$352,000.

On July 20, 2011, Forest Gate reports that it has amended its participation in the oil and gas licenses located in areas known as Rangeview, Divide and Katherine in the south western region of the Province of Saskatchewan. As a result of this arrangement with Trafina Energy Ltd., the majority owner and operator of the oil and gas licenses, Forest Gate has reduce its non-operated ownership from a 20 percent undivided working interest to a 10 percent undivided working interest in the licenses. As part of this transaction, payables totalling \$253,711 were forgiven. Of the \$253,711, \$177,000 related to the initial liability due to the joint venture that was assumed on purchase. The remaining \$76,711 related to payables due to Trafina and were associated with operating losses on the oil and gas assets that occurred after the transaction closed. The remaining 90 percent interest is owned and operated by Trafina Energy.

The relinquishment of the 10% interest of \$789,900 and the write off of the related portion of deferred costs of \$6,550, less payables of \$253,711 that were forgiven, resulted in a loss on sale of interest in producing oil and gas properties of \$542,739.

The Company has recorded a devaluation of \$455,186 of his participation in the oil and gas licenses located in areas known as Rangeview, Divide and Katherine in the south western region of the Province of Saskatchewan. The remaining participation did not meet what was planned and the Company has devaluated these properties to show the loss of value.

Forest Gate Energy Inc.

Management's Discussion and Analysis

For the period ended December 31, 2011

During the year 2011, the depletion for the properties of Emerald Bay was \$135,000 and the depletion for Rangeview, Divide and Katherine was \$185,605.

At the year end, the Company has decided to record the remaining value of Rangeview, Divide and Katherine as an asset held for sale. The Company is still in negotiation to sell these properties.

Assets held for sale

Forest Gate continues to own its Saskatchewan diamond properties, which includes the East Side and West Side properties at the Fort a la Corne kimberlite field. The Company is looking for an investor for these mining properties that are now held for sale. The fair market value of the properties is based on an offer received for them and has been reduced to \$300,000 to reflect this value.

The Company is also looking for sale his remaining participation in the oil and gas licenses located in areas known as Rangeview, Divide and Katherine in the south western region of the Province of Saskatchewan.

Liquidity, Financing and Capital Resources

The Company's ability to fund operations is contingent on revenues from oil and gas properties and raising of new equity through the issuance of shares. Should the Company encounter operating problems at its oil and gas properties that reduce cash flow or be unable to raise new capital, the Company's cash situation could deteriorate rapidly. Please see risk factors for more detailed explanations.

The Company seeks to raise capital to fund operations through a variety of methods including but not limited to issuing equity, raising debt, selling a portion or all of certain assets or concluding partnership opportunities depending on which method offers the best value to shareholders.

Cash and cash equivalents as at December 31, 2011 totalled \$115,193 when compared to \$396,991 at December 31, 2010.

Cash flows used in the operating activities were \$2,177,568 for the year 2011 (\$1,242,871 – 2010):

Cash provided by (used in) operating activities	2011	2010

	(625,867)	(1,683,138)

The Company currently has no financial commitments for spending and is constantly seeking to raise capital on favourable terms for its shareholders. The Company presently has no commitment for new funding nor unused debt capacity it can draw on.

Issue of Equity

Net proceeds from the issues of equity amounted to \$1,411,102 during the twelve months of 2011 (\$2,612,737 in the same period of 2010).

On January 15, 2010, Forest Gate issued 5,160,000 Units at a price of \$0.10 per Unit, for total gross proceeds of \$516,000. Each Unit consists of one common share and one half common share purchase warrant and net proceeds credited to share capital of \$314,870 after payment of share issue costs. Share issue costs include \$2,500 of cash finder's fee, a stock based compensation of \$196,080 in the form of 2,580,000 warrants and \$2,550 to agents paid in the form of 25,000 broker warrants. Broker warrants were credited to contributed surplus.

On January 18, 2010, the Company was granted an option by a Denver based company with regards to Forest Gate's potential acquisition of various oil and gas licenses in Utah. The option was granted in consideration for \$50,000 payable to the vendor by the issuance of 344,827 Forest Gate common shares.

On February 17, 2010, Forest Gate issued 2,364,960 Units at a price of \$0.13 per Unit, for total gross proceeds of \$307,445. Each Unit consists of one common share and one half common share purchase warrant and net proceeds credited to share capital of \$205,546 after payment of share issue costs. Share issue costs include \$8,379 of cash finder's fee, a stock based compensation of \$88,686 in the form of 1,182,479 warrants and \$4,834 to agents paid in the form of 64,450 broker warrants. Broker warrants were credited to contributed surplus.

On February 25, 2010, Forest Gate issued 906,053 common shares with no value consideration in exchange of 906,053 subscription receipts that were issued on October 13, 2009.

Forest Gate Energy Inc.

Management's Discussion and Analysis

For the period ended December 31, 2011

On May 5, 2010, Forest Gate issued 1,324,000 Units at a price of \$0.25 per Unit, for total gross proceeds of \$331,000. Each Unit consists of one common share and one half common share purchase warrant and net proceeds credited to share capital of \$260,184 after payment of share issue costs. Share issue costs include \$16,250 of cash finder's fee, a stock based compensation of \$48,326 in the form of 662,000 warrants and \$6,240 to agents paid in the form of 65,000 broker warrants. Broker warrants were credited to contributed surplus.

On May 5, 2010, the Company issued 1,504,962 common shares to Blue Note Mining Inc. at a deemed price of \$0.20 each. These shares have been issued in settlement of a debt of \$330,992 resulting from Blue Note's payment of various invoices on the Company's behalf.

On July 30, 2010, Forest Gate issued 4,228,290 common shares valued at \$380,546, based on the fair market value using the quoted market price on the date of grant. The shares were issued for unpaid salaries and consulting fees, payable to officers, directors and consultants of the Company. The payment of salaries and consulting fees had been deferred in order to preserve cash.

On October 8, 2010, Forest Gate issued 3,000,000 common shares to acquire the Pershing gold property (see note 6) in Val D'Or, Quebec. A finder's fee of 150,000 Forest Gate common shares has been paid to a consultant. The net proceed credited to share capital is \$252,000.

On October 28, 2010, Forest Gate issued 6,111,110 flow-through Units at a price of \$0.09 per Unit, for gross proceeds of \$550,000. Each flow-through Unit consists of one flow-through common share and one non-flowthrough common share purchase warrant and net proceeds credited to share capital of \$309,833 after payment of share issue costs. Share issue costs include \$27,500 of cash finder's fee, a stock based compensation of \$183,333 in the form of 6,111,110 warrants and \$29,334 to agents paid in the form of 611,111 broker warrants. Broker warrants were credited to contributed surplus.

On October 28, 2010, Forest Gate issued 625,000 Units at a price of \$0.08 per unit for gross proceeds of \$50,000. The hard dollar unit consists of one common share and one common share purchase warrant and net proceeds credited to share capital of \$23,125 after payment of share issue costs. Share issue costs include \$2,500 of cash finder's fee, a stock based compensation of \$21,250 in the form of 625,000 warrants and \$3,125 to agents paid in the form of 62,500 broker warrants. Broker warrants were credited to contributed surplus.

On November 26, 2010, Forest Gate reported that it has completed its unwinding transaction with Vanterra Energy Inc. by transferring its 70% interest in certain Arizona and Utah oil and gas licenses vended-in to Forest Gate in the fourth quarter of 2009 and January 2010 in exchange for the surrender by Vanterra of 3,596,053 common shares (\$593,349) of Forest Gate, 4,343,947 subscription receipts (\$716,751) convertible into common shares of Forest Gate, and 7,300,000 common share purchase warrants (\$700,800).

On December 10, 2010, Forest Gate issued 94 Units, comprising a total of 470,000 common shares and 470,000 flow-through shares for gross proceeds of \$94,000. Each Unit consists of 5,000 common share and 5,000 flow-through common shares and 10,000 common share purchase warrants. Net proceeds credited to share capital were \$59,220 after payment of share issue costs. Share issue costs include a stock based compensation of \$34,780 in the form of 940,000 warrants.

On December 17, 2010, Forest Gate issued 4,100,000 units, comprising of 4,100,000 flow-through shares and 4,100,000 common share purchase warrants for gross proceeds of \$410,000. Each Unit consists of 1 flowthrough common shares and 1 common share purchase warrants and net proceeds credited to share capital of \$258,300 after payment of share issue costs. Share issue costs include a stock based compensation of \$151,700 in the form of 4,100,000 warrants.

During the year 2010, 722,050 warrants (\$150,456) were exercised into common share, 157,550 broker warrants (\$25,183) and 150,000 stock options (\$23,250). During January 2011, Forest Gate received \$40,000 as receivable from subscribers from the private placement announced on December 17, 2010.

Forest Gate Energy Inc.

Management's Discussion and Analysis

For the period ended December 31, 2011

During January 2011, Forest Gate received \$40,000 from subscribers to a private placement announced on December 17, 2010.

On February 24, 2011, Forest Gate issued 7,980,000 common shares at a price of \$0.11 per share in consideration for the acquisition of participation of 20% of oil and gas assets located in south western Saskatchewan. The remaining 80% interest is owned and operated by Trafina Energy Ltd., a publicly-traded oil and gas company based in Calgary, Alberta.

On March 18, 2011, Forest Gate cancelled 344,827 common shares that were granted on January 2010 to a Denver based company with regards to the potential acquisition of various oil and gas licenses in Utah. The option was cancelled and the value of the shares for \$50,000 was reversed into capital stock.

On April 11, 2011, Forest Gate issued 4,015,909 Units at a price of \$0.11 per Unit, for total gross proceeds of \$441,750. Each Unit consists of one common share and one common share purchase warrant and net proceeds credited to share capital of \$218,522 after payment of share issue costs. Share issue costs include \$26,383 of cash finder's fee and a stock based compensation of \$13,960 in the form of 209,090 broker warrants. Broker warrants were credited to contributed surplus.

On May 6, 2011, the Company issued a total of 5,405,400 common shares to Jones, Gable & Company Limited in payment of the principal amount of \$675,675 outstanding in respect of a convertible debenture issued by the Company in January 2010. The common shares were issued as a result of the exercise by the Company of its conversion privilege contained in convertible debenture, and at the conversion price provided for in the convertible debenture, namely \$0.125 per share.

On June 29, 2011, Forest Gate issued 782,500 Units at a price of \$0.08 per Unit, for total gross proceeds of \$62,600. Each Unit consists of one common share and one common share purchase warrant and net proceeds credited to share capital of \$32,487 after payment of share issue costs. Share issue costs include \$5,634 of cash finder's fee and a stock based compensation of \$3,368 in the form of 70,425 broker warrants. Broker warrants were credited to contributed surplus.

On June 30, 2011, Forest Gate issued 147 Units at a price of \$0.06 per Unit, for total gross proceeds of \$176,400. Each Unit consists of 4,000 common share, 16,000 "flow-through" common shares and 8,000 common share purchase warrant and net proceeds credited to share capital of \$103,972 after payment of share issue costs. Share issue costs include \$17,639 of cash finder's fee and a stock based compensation of \$14,065 in the form of 294,000 broker warrants. Broker warrants were credited to contributed surplus.

On July 26, 2011, Forest Gate issued 269 Units at a price of \$0.06 per Unit, for total gross proceeds of \$322,800. Each Unit consists of 4,000 common share, 16,000 "flow-through" common shares and 8,000 common share purchase warrant and net proceeds credited to share capital of \$227,627 after payment of share issue costs. Share issue costs include \$31,128 of cash finder's fee and a stock based compensation of \$17,099 in the form of 538,000 broker warrants. Broker warrants were credited to contributed surplus.

On September 23, 2011, Forest Gate issued an aggregate of 2,500,000 mineral flow through units at a price of \$0.06 per Unit, for total gross proceeds of \$150,000. Each Unit consists of one common share and one common share purchase warrant entitling the holder to acquire one additional common share at an exercise price of twelve cents (\$0.12) for a period of two years. Net proceeds credited to share capital of \$89,132 after payment of share issue costs. Share issue costs include \$15,000 of cash finder's fee and a stock based compensation of \$6,030 in the form of 250,000 broker warrants. Broker warrants were credited to contributed surplus.

Forest Gate Energy Inc.

Management's Discussion and Analysis

For the period ended December 31, 2011

On October 14, 2011, Forest Gate issued an aggregate of 3,666,666 mineral flow through units at a price of \$0.06 per Unit, for total gross proceeds of \$220,000. Each Unit consists of one common share and one common share purchase warrant entitling the holder to acquire one additional common share at an exercise price of twelve cents (\$0.12) for a period of two years. Net proceeds credited to share capital of \$130,501 after payment of share issue costs. The warrants were evaluated with the Black Scholes method to a total amount of \$58,633. Share issue costs include \$22,000 of cash finder's fee and a stock based compensation of \$8,866, evaluated with the Black Scholes method, in the form of 366,666 broker warrants. Broker warrants were credited to contributed surplus.

On October 18, 2011, Forest Gate issued 166 Units at a price of \$1,200 per Unit, for total gross proceeds of \$199,200. Each Unit consists of 20,000 "flow-through" common shares and 20,000 common share purchase warrant and net proceeds credited to share capital of \$146,155 after payment of share issue costs. The warrants were evaluated with the Black Scholes method to a total amount of \$53,045.

Share Capital

On June 30, 2009, the shares of the Company were consolidated on the basis of one (1) post-consolidation common share for every ten (10) pre-consolidation common shares held, passing from 142,322,333 to 14,232,233 common shares issued and outstanding. As a result, Basic and diluted net earnings (loss) per common shares have been retroactively adjusted to reflect the stock consolidation.

The weighted average number of shares issued and outstanding as at December 31, 2011 is 49,857,876 compared to 30,406,731 as at December 31, 2010. As of December 31, 2011 there were 83,275,630 shares issued and outstanding compared to 47,629,982 at December 31, 2010.

As of the date of this report there are 83,975,630 shares issued and outstanding.

Disclosure Controls, Procedures and Internal Controls

We evaluated our disclosure controls and procedures as defined in the rules under the Canadian Securities Administrators. The Board of Director's duties include the assessment of the integrity of the Company's internal control and information system. Based on that evaluation, the Chairman and Chief Executive Officer and the Chief Financial Officer concluded that the design and operation of these disclosure controls and procedures were effective.

As of December 31, 2011 we believe that our internal control systems at Forest Gate are sufficient to execute our business plan and to provide meaningful results upon which to manage our business. No changes were made in our internal control systems during the period that have materially affected our financial reporting and controls.

Summary of Significant of Accounting Policies

Financial instruments

The Company determines the classification of its financial assets and liabilities at initial recognition and, where allowed and appropriate, re-evaluates this designation at year end. All financial instruments are recognized initially at fair value. Transaction costs are included in the initial carrying amount of each financial instrument except for instruments under the fair value through profit and loss category which are expensed as incurred. Measurement in subsequent periods depends on its classification. Financial instruments are classified as either: fair value through profit or loss; loans and receivables; available for sale; held to maturity or financial liabilities measured at amortized cost as defined by IAS 39.

Financial instruments classified as fair value through profit or loss are measured at their fair values at each reporting period with the change in fair value recognized in net income (loss). Loans and receivables, held to

Forest Gate Energy Inc.

Management's Discussion and Analysis

For the period ended December 31, 2011

maturity and financial liabilities measured at amortized cost are all measured at amortized cost less any impairment using the effective interest method. Amortization of any discounts or premiums is recognized in finance expense. The Company's cash and cash equivalents are classified as loans and receivables and consist of cash and cash equivalents that have a maturity of three months or less. Financial assets classified as available for sale are measured at fair value with changes in fair value recognized in other comprehensive income (loss). When available for sale items are derecognized or impaired the amounts previously recorded in other comprehensive income are recognized in net income (loss).

A financial liability is derecognized when the obligation under the liability is discharged, cancelled or expires. When an existing financial liability is replaced and/or substantially modified, the difference in the respective carrying amounts is recognized in net income (loss).

The Company assesses at each reporting date whether there is any objective evidence that a financial asset or a group of financial assets is impaired. Impairments are recognized in net income (loss) as they occur.

Exploration and Evaluation

Exploration and evaluation ("E&E") costs are capitalized as either tangible or intangible exploration and evaluation assets for projects after the Company has acquired the legal right to explore but prior to their technical feasibility and commercial viability being confirmed. These costs may include costs of license acquisition, technical services and studies, seismic acquisition, exploration drilling and testing, directly attributable overhead and administration expenses, including remuneration of production personnel and supervisory management, the projected costs of retiring the assets, and any activities in relation to evaluating the technical feasibility and commercial viability of extracting mineral resources.

Once technical feasibility and commercial viability are confirmed the E&E asset is first tested for impairment and then reclassified to property, plant and equipment. For purposes of impairment testing, E&E assets are allocated to the appropriate cash-generating units based on geographic proximity. Expired lease costs are expensed as part of depletion and depreciation expense as they occur and costs incurred prior to the legal right to explore are charged to net income (loss).

Equipment

Equipment are recorded at cost. Depreciation and amortization is calculated over the estimated useful lives of the related assets at the following rates and methods:

	Rates	Methods
Furniture and office equipment	20%	Diminishing balance
Computer equipment	30%	Diminishing balance

Producing oil and gas assets

Producing oil and gas assets ("O&G") includes costs directly attributable to oil and natural gas development and production that are not E&E and costs for other tangible goods including office equipment and other. O&G is recorded at cost less accumulated depletion, depreciation, and impairment losses net of recoveries. Gains and losses on disposal of oil and natural gas properties are recognized in net income (loss). The carrying amount of a replaced asset is derecognized when replaced.

The provision for depletion for oil and natural gas assets is calculated for each major area using the unit-of-production method based on the area's production for the period divided by the Company's estimated total proved and probable oil and natural gas reserve volumes before royalties for that area. Production and reserves of natural gas and associated liquids are converted at the energy equivalent ratio of six thousand cubic feet of natural gas to one barrel of oil. Estimates of future development costs for developing the proved and probable reserves are included in each area's depletion base.

Forest Gate Energy Inc.

Management's Discussion and Analysis

For the period ended December 31, 2011

Impairment of long-lived assets

The Company evaluates the recoverability of its long-lived assets at each reporting period. An impairment loss is recognized when estimated future cash flows resulting from the use of an asset and its eventual disposition is less than its carrying amount. When indicators of impairment exist, the Company determines if the recoverable amount of the asset or cash generating unit ("CGU") is greater than its carrying amount. A CGU is defined as the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows of other assets or groups of assets. The Company has used geographical proximity, geological similarities, analysis of shared infrastructure, commodity type, assessment of exposure to market risks and materiality to define its CGUs.

For exploration and evaluation assets, the indicators for impairment include significant unfavourable economic, legal regulatory, environmental, political and other factors. In addition, management's development activities towards its planned principal operations are a key factor considered as part of the on-going assessment of the recoverability of the carrying amount of its exploration and evaluation assets.

Whenever events or changes in circumstances indicate that the carrying amount of a resource property in the exploration stage may be impaired, the capitalized costs are written down to the estimated recoverable amount. For producing oil and gas assets any write-downs are recognized as additional depletion in net income (loss).

Impairments are reversed in subsequent periods when there has been an increase in the recoverable amount of a previously impaired asset or CGU and these reversals are recognized in net income (loss). The recovery is limited to the original carrying amount less depletion and depreciation that would have been recorded had the asset not been impaired.

Assets held for sale and discontinued operations

Assets classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell. Assets are classified as held for sale if their carrying amounts will be recovered principally through a sale transaction rather than through continuing use or abandonment. This condition is regarded as met only when the sale is highly probable and the assets are available for immediate sale in their present condition. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

Any profit or loss arising from the sale or re-measurement of discontinued operations is presented as part of a single line item in the Statement of Operations and Comprehensive Loss.

General provisions and decommissioning liabilities

i) General provisions

A provision is a liability of uncertain timing or amount of a future expenditure when the Company has a present obligation as a result of a past event, it is probable that an outflow of resources will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The present value of expected future cash outflows is recognized as a liability and the increase to the liability due to the passage of time is recorded as a finance expense. The Company uses a credit adjusted discount rate that reflects current market assessments of the time value of money and the risk specific to the liability.

ii) Decommissioning liabilities

Decommissioning liabilities are present obligations where the Company is required to retire assets or restore sites where assets are located and includes restoring well and facility sites and decommissioning plants and oil batteries. When a liability is recorded, the carrying amount of the related asset is increased by the same amount.

Forest Gate Energy Inc.

Management's Discussion and Analysis

For the period ended December 31, 2011

The amount recognized represents management's estimate of the present value of the estimated future expenditures to abandon and reclaim the Company's net ownership in wells and facilities determined in accordance with local conditions and requirements as well as an estimate of the future timing of the costs to be incurred. These costs are subsequently depleted or depreciated as part of the costs of the item of O&G. Any changes in the estimated timing of the decommissioning or decommissioning cost estimates are accounted for prospectively by recording an adjustment to the provision, and a corresponding adjustment to O&G.

Share based payments

The Company uses the fair value method to record compensation expense with respect to stock options and warrants granted in exchange for goods and services. This method is applied for all awards made to non-employees and employees. The fair value of each option or warrant granted is estimated on the date of grant and the amount is recorded as share-based payments reserves over the term of the grant agreement. Compensation expense associated with options issued to employees, consultants, officers and directors of the Company are expensed. Compensation expense related to broker warrants issued are recorded as share issue costs and deducted from share capital.

The fair value of share based payments is measured using the Black Scholes option pricing model. The measurement inputs include the measurement date share price, exercise price of the instrument, expected share price volatility, the expected life of the instrument adjusted for expected forfeitures and the measurement date risk-free interest rate.

Flow through common shares

The Company finances a portion of its exploration activities through the issuance of flow-through shares.

On the date of issuance of the flow-through shares, the premium relating to the proceeds received in excess of the closing market price of the Company's shares is allocated to liabilities. Under the terms of the flow-through common share issues, the tax attributes of the related expenditures are renounced to investors. The premium liability is reduced pro-rata based on the actual amount of flow-through eligible expenditures incurred during the reporting period. The reduction to the premium is recognized through profit and loss as other income.

A deferred tax liability is recognized for the taxable temporary difference that arises from the difference between the carrying amount of eligible expenditures that are capitalized to exploration and evaluation assets and their tax basis. If the Company has sufficient tax assets to offset the deferred tax liability the liability will be offset by the recognition of a corresponding deferred tax asset and recovery of deferred income taxes through profit or loss in the reporting period.

Loss per share

Basic loss per share is computed by dividing net loss by the weighted average number of common shares outstanding during the year. Diluted loss per share reflects the potential dilution of common share equivalents, such as outstanding stock options, in the weighted average number of common shares outstanding during the year, if dilutive. For this purpose, the treasury stock method is used for the assumed proceeds upon the exercise of stock options that are used to purchase common shares at the average market price during the year.

Due to the Company incurring net losses for the fiscal years ended December 31, 2011 and 2010, no incremental shares are included in calculating diluted loss per share because the effect would be anti-dilutive. As a result, basic and diluted loss per share are equal.

Forest Gate Energy Inc.

Management's Discussion and Analysis

For the period ended December 31, 2011

Income taxes

i) Current income tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the statement of financial position date.

ii) Deferred income tax

The Company follows the asset and liability method for calculating deferred income taxes. Differences between the amounts reported in the financial statements and the tax bases are applied to tax rates in effect to calculate deferred tax assets and liabilities. The effect of any change in income tax rates is recognized in the current period income. Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted by the statement of financial position date. Discounting of deferred tax assets and liabilities is not permitted. Deferred tax assets and liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes related to the same taxable entity and the same taxation authority. Deferred tax is provided in full for all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements, except when the temporary differences arises from the initial recognition of goodwill, or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

Revenue recognition

Revenue associated with oil and gas sales is recognized when title passes from the Company to its customers.

Risks and uncertainties

The Company is exposed to various risks arising from financial instruments. The following analysis provides a measurement of risks as at December 31, 2011.

Credit risk: the Company's principal financial assets are cash and cash equivalents and accounts receivable. Cash and cash equivalents are held with major financial institutions and the risk of default is considered remote. Credit risk arises from the potential that a counter party will fail to perform its obligations. The Company is exposed to credit risk from customers and project operators. The maximum exposure to credit risk as at December 31, 2011 is represented by the carrying value of the accounts receivable on the balance sheet.

Liquidity risk: the cash and cash equivalents on hand and expected cash generated from operations will allow the Company to meet its planned operating requirements. Financial liabilities all have maturity dates prior to December 31, 2012. Additional funds will be required to meet the Company's planned capital expenditures.

Covenant risk: The Company has a loan from one bank with a liquidity ratio covenant that is reported quarterly. Failure to meet this covenant could see the bank take a number of actions to force repayment of its loan including selling the Company's oil and gas assets in a compressed time frame with likely a negative impact on the total sale proceeds received.

Market risk - commodity price risk: the value of the Company's mineral resource properties is related to the prices of oil, gas and diamonds and the outlook for these commodities. Commodity prices historically have fluctuated widely and are affected by numerous factors outside the Company's control, including, but not limited to, industrial and retail demand, levels of worldwide production, short term changes in supply and demand due to speculative hedging activities, and macro-economic variables.

Forest Gate Energy Inc.

Management's Discussion and Analysis

For the period ended December 31, 2011

The profitability of the Company's continuing operations is highly correlated to the market price of oil and gas. To the extent that prices increase over time, asset value increases and cash flows improve; conversely, declines in the prices directly impact value and cash flows negatively. A protracted period of depressed prices could impair the Company's operations and development opportunities, and significantly erode shareholder value. The Company did not have any financial instruments in place to manage commodity prices during the period ended December 31, 2011.

Market risk - market sensitivity analysis: due to the fact that the Company is at a very early stage of production and has not as yet developed its most significant assets, it is not possible to do a market sensitivity analysis on the earnings.

Market risk – dependence: oil and gas activities are conducted presently through partners and in respect of which the Company is not the operator. Forest Gate is dependent upon its operating partners for the financial and technical support which they contribute to the Company's oil and gas projects. If those operating partners are unable to fulfill their own contractual obligations, the Company's interests could be jeopardized, resulting in project delays, additional costs and loss of the participating interests.

Accounting changes and new pronouncements

IFRS 9 Financial Instruments: Classification and Measurement

IFRS 9 as issued reflects the first phase of the IASB's work on the replacement of IAS 39 and applies to classification and measurement of financial assets and liabilities as defined in IAS 39. The standard is effective for annual periods beginning on or after January 1, 2013. The adoption of IFRS 9 is not expected to have a significant impact on the financial statements.

IFRS 11 Joint Arrangements

IFRS 11 *Joint Arrangements* will apply to interests in joint arrangements where there is joint control. IFRS 11 would require joint arrangements to be classified as either joint operations or joint ventures. The structure of the joint arrangement would no longer be the most significant factor when classifying the joint arrangement as either a joint operation or a joint venture. In addition, the option to account for joint ventures, previously called jointly controlled entities, using proportionate consolidation would be removed, and equity accounting would be required. Venturers would transition the accounting for joint ventures from the proportionate consolidation method to the equity method by aggregating the carrying values of the proportionately consolidated assets and liabilities into a single line item. These amendments are effective for annual periods beginning on or after January 1, 2013 and early adoption is permitted. The Company has not yet assessed the impact of the new standard on the financial statements.

IFRS 12 Disclosure of Interests in Other Entities

The IASB has issued IFRS 12 *Disclosure of Interests in Other Entities*, which includes disclosure requirements about subsidiaries, joint ventures, and associates, as well as unconsolidated structured entities and replaces existing disclosure requirements. This standard is effective for annual periods beginning on or after January 1, 2013. Entities will be permitted to apply any of the disclosure requirements in IFRS 12 before the effective date. The Company has not yet assessed the impact of the new standard on the financial statements.

IFRS 13 Fair Value Measurements

IFRS 13 establishes a single source of guidance for fair value measurements, when fair value is required or permitted by IFRS. The key features of IFRS 13 include: a single framework for measuring fair value while requiring enhanced disclosures when fair value is applied, fair value would be defined as the 'exit price', and concepts of 'highest and best use' and 'valuation premise' would be relevant only for non-financial assets and liabilities. IFRS 13 is effective for annual periods beginning on or after January 1, 2013 and early adoption is permitted. The Company has not yet assessed the impact of the new standard on the financial statements.

Forest Gate Energy Inc. Management's Discussion and Analysis

For the period ended December 31, 2011

IAS 27 Separate Financial Statements

As a result of the issue of the new consolidation suite of standards, IAS 27 *Separate Financial Statements* has been reissued, as the consolidation guidance will now be included in IFRS 10. IAS 27 will now only prescribe the accounting and disclosure requirements for investments in subsidiaries, joint ventures and associates when an entity prepares separate financial statements. These amendments are effective for annual periods beginning on or after January 1, 2013 and early adoption is permitted. The Company has not yet assessed the impact of the new standard on the financial statements.

IAS 28 Investments in Associates and Joint Ventures

As a consequence of the issue of IFRS 10, IFRS 11 and IFRS 12, IAS 28 has been amended and will provide the accounting guidance for investments in associates and to set out the requirements for the application of the equity method when accounting for investments in associates and joint ventures. The amended IAS 28 will be applied by all entities that are investors with joint control of, or significant influence over, an investee. These amendments are effective for annual periods beginning on or after January 1, 2013 and early adoption is permitted. The Company has not yet assessed the impact of the new standard on the consolidated financial statements.

Off-Balance Sheet Arrangements

The Company does not have any off-balance sheet arrangements.

Readers are encouraged to read and consider the risk factors, which are incorporated in this MD&A, and additional information regarding the Corporation, the SEDAR website at www.sedar.com.
